02 ORIGINAL CONCEPT DIRECTIONS

82 distinct bottle concepts, now presented as a compact four-per-page development gallery.

Concept visualization only. New mold development, structural engineering, component fit, decoration tests, and production validation are required before commercialization.

CONCEPT GALLERY • 01

FOR CUSTOM DEVELOPMENT & ENGINEERING EVALUATION

C-01

Dune Reliquary

Low trapezoidal reliquary · smoky topaz glass · bronze vertical rim

C-02

Night Portal

Tall split-shoulder arch · ink-blue glass · black ceramic cap

C-03

Amber Meridian

Flattened oblate sphere · honey-amber glass · aged-bronze cap

C-04

Pearl Veil

Asymmetric oval · half-frosted pearl glass · champagne-metal cap

Concept visualization · New mold and engineering validation required

CUSTOM DEVELOPMENT

From bottle structure to complete fragrance packaging

A coordinated development route for perfume and fragrance brands.

01

Glass bottle development

Stock selection, shape development and custom mold coordination.

02

Caps & sprayers

Closure, collar and pump matching for a coherent complete set.

03

Surface decoration

Color coating, frosting, silk screen printing and hot stamping.

04

Sample support

Sample preparation and pre-production confirmation before scale-up.

05

OEM support

Brand artwork, decoration application and packaging coordination.

06

Shipment preparation

Inspection, packing and FOB export coordination.

SCALE WHERE IT MATTERS. CONTROL WHERE IT COUNTS.

UP TO

200,000

glass bottles / day

AROUND

90,000

caps / day

QUALITY CONTROL

100% inspection for key appearance defects

Combined with dimensional checks, functional checks, and pre-shipment sampling inspection.

Capacity reflects coordinated production resources in Xuzhou and Heze and should be confirmed against the selected product and order plan.

A DISCIPLINED ROUTE TO PRODUCTION

Five checkpoints keep design intent and manufacturing reality aligned

- | | | |
|-----------|-------------------------------|--|
| 01 | Requirement alignment | Bottle, capacity, closure, decoration, quantity and target market. |
| 02 | Sample confirmation | Sample preparation and decoration feasibility review. |
| 03 | Mass production | Production arranged after sample and commercial confirmation. |
| 04 | Quality inspection | Key appearance, dimensional and functional checks. |
| 05 | Packing & shipment | Packing verification and FOB shipment preparation. |

Typical sample preparation time: approximately 20 days, subject to bottle design and decoration requirements.

CLEAR STARTING TERMS

Core information for initial quotation and project planning

MOQ

5,000 pcs / model

Applies to the products presented in this catalog.

SAMPLE FEE

Based on bottle design

Quoted according to the selected bottle, cap and decoration scope.

SAMPLE PREPARATION

Approx. 20 days

Subject to product and decoration requirements.

READY-STOCK ORDER

Approx. 2 months

Timing starts after order and specification confirmation.

CUSTOM ORDER

Approx. 3 months

Subject to mold, sample, decoration and production confirmation.

TRADE TERM

FOB

Loading port is confirmed according to the production and shipment plan.

All lead times are planning references and are confirmed in the final quotation based on product, decoration, quantity and production schedule.
